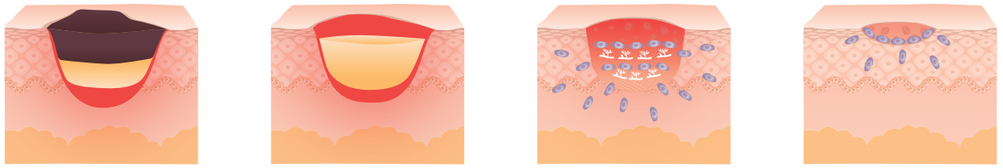
DIGME

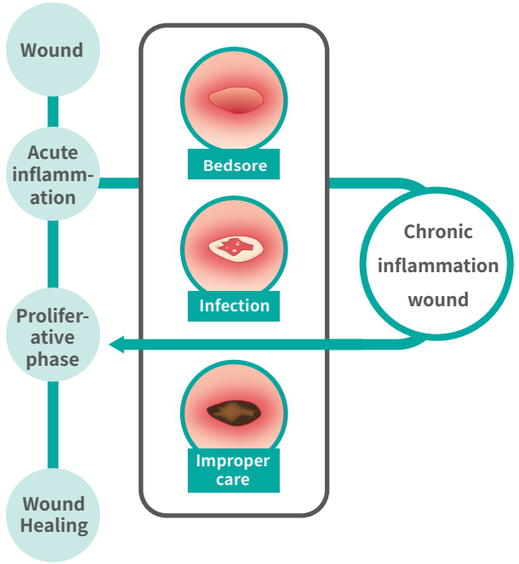
Each stage of wound healing requires different products. The TAICEND product line offers tailored solutions to support optimal healing outcomes through proper product selection and combination.



Wound Healing	**D**ebridement	**I**nfection control	**G**ranulation	**M**oisture balance	**E**pithelialization
Technical Measures	• Promotes autolytic debridement. • Natural removal of eschar. • Creates a healing environment	• Provides a protective barrier against foreign substances. • Minimizes the risk of infection.	• Polysaccharides form a scaffold for cell migration. • Provide nutrients to support the growth and migration of granulation cells. • Reduce the risk of infection.		• Maintains a moist environment. • Supports epidermal recovery. • Promotes the migration of newly formed epithelial cells.
TAICEND Counter-measures	 	 	    		 

Chronic Wound Series

What causes chronic wounds?



Debridement

Helps soften scabs

New granulation tissue Cell migration

Wound cavity packing

Exudate control

Supports epidermal recovery

TAICEND Hydrogel

Format	25ml	26ml
REF	G1-010	G1-014

- Promotes autolytic debridement
- Activates macrophagesand accelerates healing
- Helps the natural removal of eschar

Intended Use : Covers wounds, including low to moderate exudate wounds, chronic wounds (e.g., open ulcers, pressure sores, etc.).

TAICEND Alginate Wound Dressing

Format	10x10cm	15x15cm	15x17cm
REF	A1-001	A1-002	A1-007

- High absorption
- Good gelling protection
- Suitable for cavity wound

Intended Use : Slight bleeding wounds, acute or chronic wounds with moderate or large amounts of exudate, wounds lacking epithelial tissue, and cavity wounds

TAICEND Wound Gel

Format	10ml	25ml	26ml
REF	G1-006	G1-009	G1-013

- Promoting epithelialization
- Granulation tissue growth
- Accelerating wound healing

Intended Use : For any superficial wounds (abrasions, first and second degree burns, blisters wounds), low to moderate exudate wounds, chronic wounds (open wounds) Ulcers, bedsores, etc.)

TAICEND Wound Patch

Format	10x10cm	15x15cm
REF	O2-003	O2-004

- Add moisturizing factor
- Protect the wound and granulation tissue

Intended Use : Any superficial injury (e.g.,. Scrapes, superficial cuts that do not require to stitches, first/second-grade burns and vesicle) which could help skin to be repaired.
Any scab and necrotic tissue

TAICEND Wound Powder

Format	0.5g	1.0g
REF	F2-002	F2-003

- Accelerate granulation
- Prevent infection
- Reduce exudate
- Suitable for wounds of various shapes

Intended Use : It is suitable for mild wounds with bleeding, acute or chronic wounds with moderate or heavy exudates, superficial or deep wounds without epidermal tissue, abrasions, etc.

TAICEND Anti-Adhesion Superabsorbent Wound Dressing

Format	7x7cm		10x10cm		12.5x12.5cm	
	2.0mm	3.5mm	2.0mm	3.5mm	2.0mm	3.5mm
REF	P1-022	P1-029	P1-006	P1-014	P1-023	P1-026

Format	15x15cm		15x17cm		10x20cm	
	2.0mm	3.5mm	2.0mm	3.5mm	2.0mm	3.5mm
REF	P1-009	P1-013	P1-024	P1-027	P1-025	P1-028

- Reduce infection
- Keep the wound bed clean
- Anti-adhesion
- Superabsorbent, High retention rate

Intended Use : General trauma, pressure sores, mild exudate wounds, first-grade burns
